TOPIC OF THE DAY
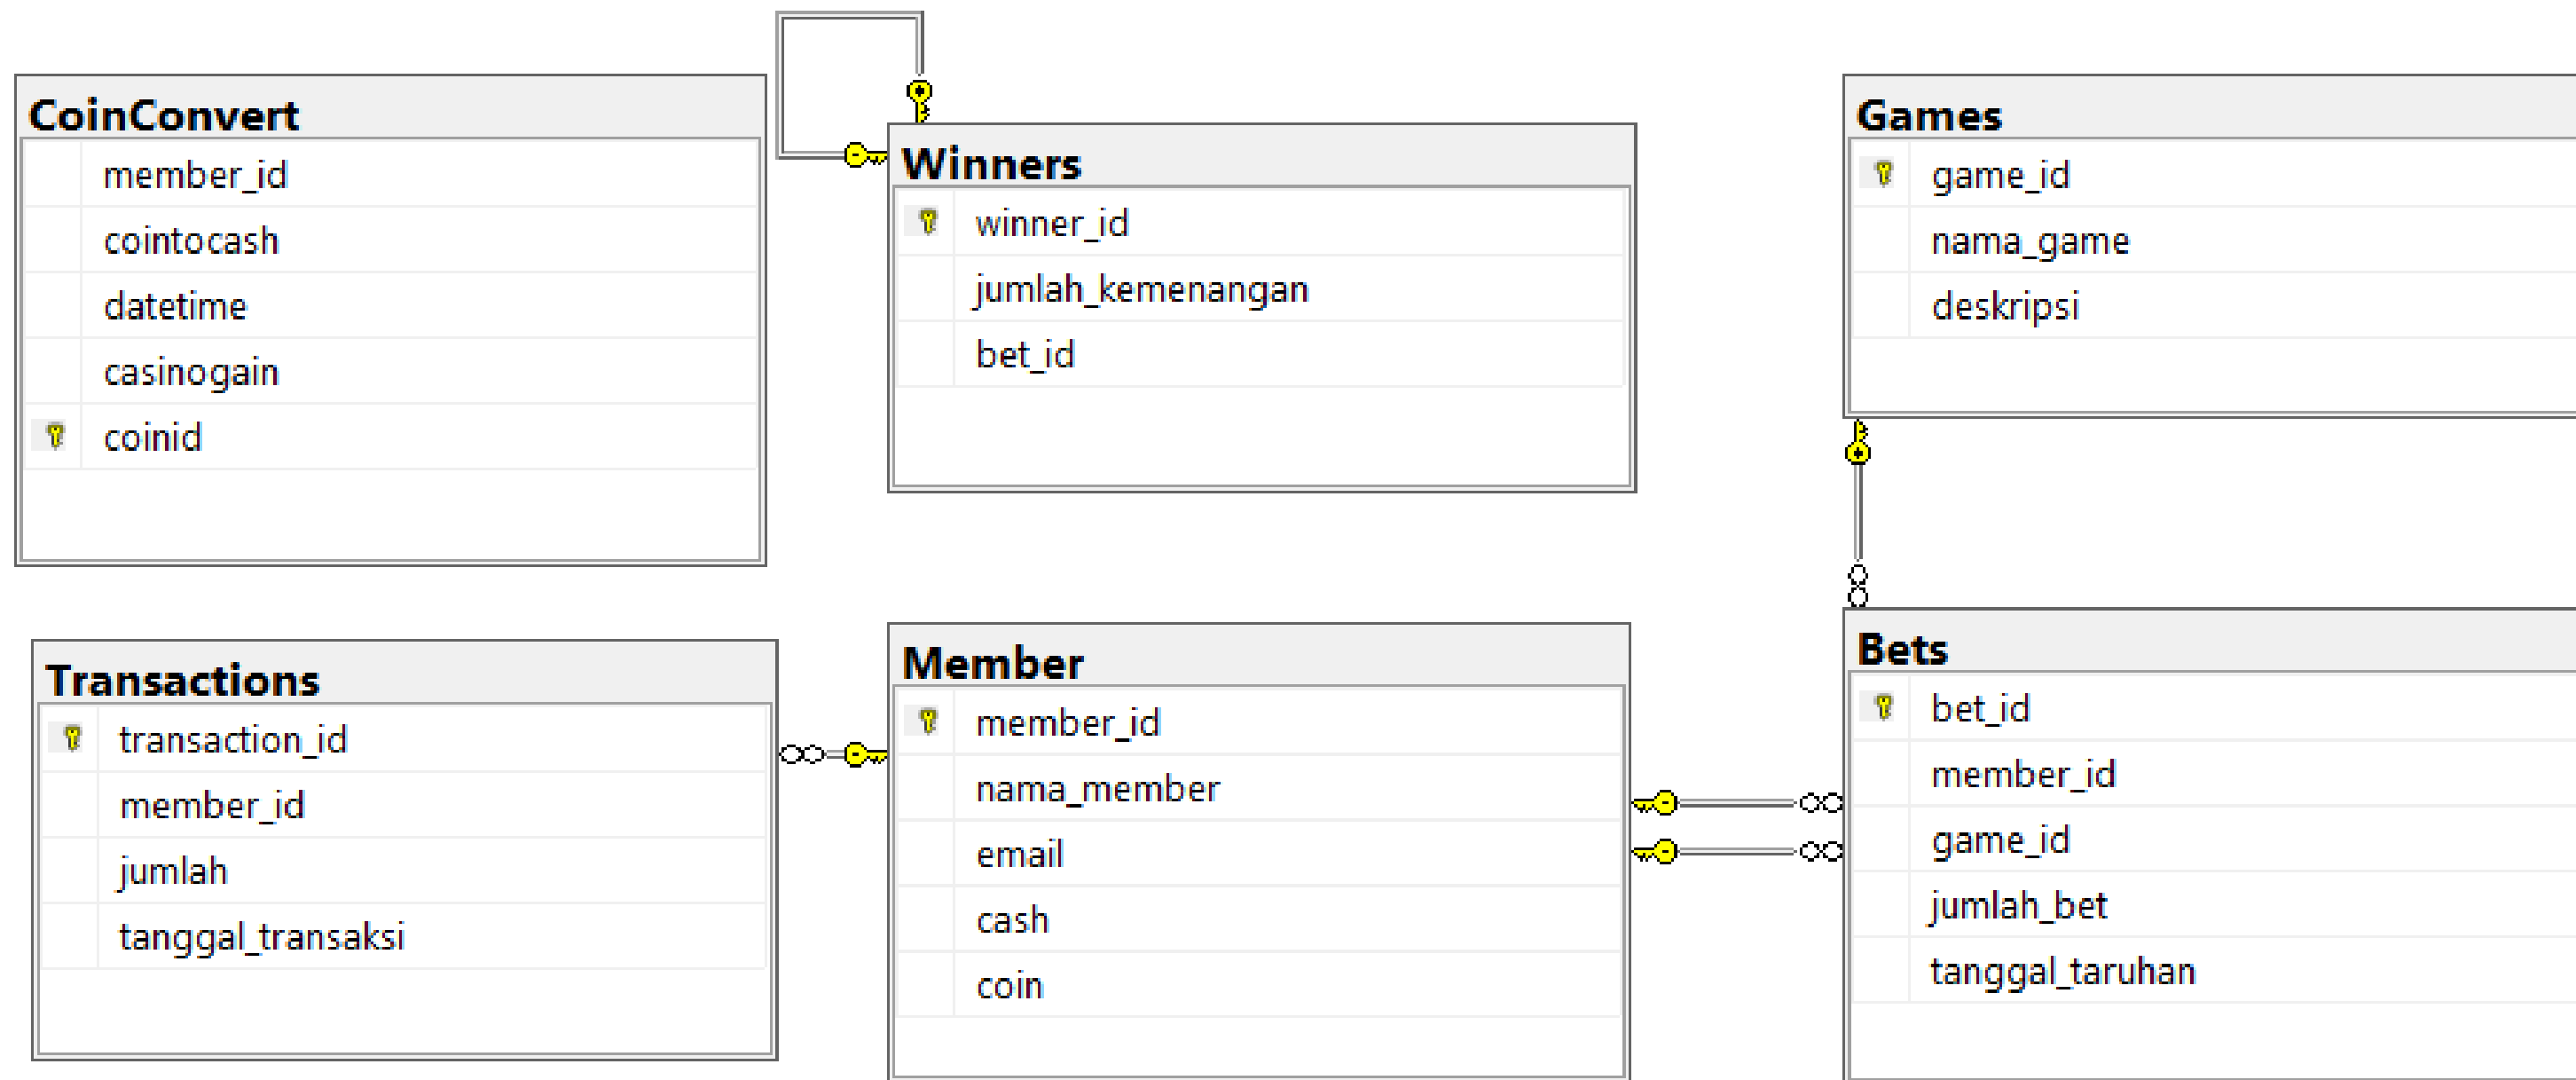

BAB 1
Online Game WD

⭐ Definition

We use cards for login so members don't need to remember passwords and usernames, ensuring that the account can only be used once (not duplicate).

Online Game WD is a game based on real-life casino. WD Online Games uses a 125Khz card to log in and register. The registered card ID will be entered into the database. Players can use real money which will be converted into coins and the coins obtained can be converted into cash with admin fees. Online Game WD provides 3 games that can be played, including Mini Keno, Lucky Spin, Odd or Even.
